

BUILDING BRIDGES IN PEDIATRIC ONCOLOGY - May 14th, 2022	
9:00	Registration
9:30	Welcoming & Introduction
9:45	Basic research
	ADDICT-pedGLIO: specific immunotherapy for pediatric brainstem glioma and pediatric high-grade glioma <i>Toon Van Genechten (UA/UZA)</i>
	The single-cell pathology landscape of pediatric glioma <i>Julie Messiaen (KU Leuven/UZ Leuven)</i>
	Exploring the diagnostic potential of cell-free reduced representation bisulfite sequencing on cerebrospinal fluid for pediatric central nervous system tumors <i>Lotte Cornelli (UGent/UZ Gent)</i>
	Metabolomic, transcriptomic, and epigenomic effects of oncosuppressor microRNAs in pediatric rhabdomyosarcoma <i>Enrico Pozzo (KU Leuven/UZ Leuven)</i>
	Acute lymphoblastic leukemia: single-cell sequencing to detect clonal heterogeneity at diagnosis and during treatment <i>Margo Aertgeerts (KU Leuven/UZ Leuven)</i>
11:15	Psychology & End-of-life Care
	Neuropsychological functioning of survivors of pediatric brain tumors <i>Jurgen Lemière (UZ Leuven)</i>
	The psychological impact of genetic testing on pediatric cancer patients and their parents <i>Sophie Van Hoyweghen (UGent)</i>
	End-of-life care in children with cancer: How to measure quality on a national level? <i>Veerle Piette (VUB/UGent)</i>
12:15	Lunch break
13:00	Work-life balance
	Experience from a pediatric oncologist's perspective <i>Anne Uyttebroeck (KU Leuven/UZ Leuven)</i>
13:45	Clinics & Pharmacology
	Approving new drugs in pediatric oncology <i>Marleen Renard (KU Leuven/UZ Leuven)</i>
	Acute vs chronic graft-versus-host disease: new insights into the pathophysiology <i>Laurens Van Camp & Victoria Bordon (UGent/UZ Gent)</i>
	Neurosurgical treatment of pediatric brain tumors <i>Philippe De Vloo (KU Leuven/UZ Leuven)</i>
	Proton therapy in pediatric solid tumors <i>Tom Boterberg (UGent/UZ Gent)</i>
15:15	Discussion & Closing remarks
15:30	Networking
