

Dear Madam, Sir,

We are pleased to inform you about the upcoming **Module Solid tumors** of our **3rd Master Course in Pediatric Oncology**.

The Master Course is a theoretical and applied curriculum for colleagues active in pediatric oncology who wish to be trained at an advanced level, like fellows in pediatric oncology, pediatric oncologists and other colleagues who wish to expand their knowledge in pediatric oncology.

The Master Course is organized by the Princess Máxima Center for Pediatric Oncology (Utrecht, The Netherlands), the largest teaching and research hospital for pediatric oncology in Europe. It consists of four modules: General Aspects, Hemato-oncology, Neuro-oncology and Solid tumors. All Modules can be followed in sequence, but also separately. The first 3 modules have already taken place and were well received by the participants (overall grade 8.8 , 8.7 and 8.6).

The live days of the next module **Solid tumors** will take place on **April 20 & 21, 2023** at the **Princess Máxima Center in Utrecht, The Netherlands**, in hybrid form.

These live days are accompanied by a comprehensive online pre- and post-program that can be followed in a self-paced manner during the month preceding and the month following the two live days. During the live days, topics are explored in greater depth during hands-on sessions which are given by national and international experts in the field. The sessions are aimed at knowledge sharing and training of clinical and professional skills. EACCME accreditation has been requested.

Go to our [event website Module 3.4 Solid tumors](#) for more information about **the program and registration**.

In addition to preparing for this module, we are already working on the 4th Master Course in Pediatric Oncology that will start in 2024. Here we will pay even more attention to challenges when treating children with cancer in low-resource settings.

The dates are:

MC 4.1 General Aspects – April 18 & 19, 2024

MC 4.2 Hemato-oncology – November 7 & 8, 2024

MC 4.3 Neuro-oncology – April 24 & 25, 2025

MC 4.4 Solid tumors – November 13 & 14, 2025

Thank you for sharing this information, for example by including a link in your newsletter or including information on your website. Please also feel free to distribute the attached flyer.

We hope to hear from you soon.

Thank you in advance!

Kind regards,
Prof. dr. Gertjan Kaspers, Director Academy & Outreach
Dr. Lenneke Schrier, Pediatric oncologist in training

Prinses Máxima Centrum voor kinderoncologie BV
